GENERAL INFORMATION

PREVENT™ is a powerful, concentrated silicone antifoam and defoamer designed to provide efficient, economical foam control. When used according to label directions, **PREVENT™** prevents foam formation and eliminates existing foam.

DIRECTIONS

BEFORE FOAM FORMATION:

The most efficient way to use **PREVENT™** is to add it to the spray mixture before the foam forms. To determine how much **PREVENT™** to add, consider:

- a. The chemicals in the spray mixture: Chemicals vary greatly in the amount of foam they cause and experience is the best guide to determine which ones need antifoam.
- b. Concentration of chemicals in the spray mixture: The higher the concentration of foam forming chemicals, the more **PREVENT™** needed.
- c. Water quality: Hard water has fewer foam problems than soft water.
- d. Use 0.5 oz/100 gal under most conditions and 1 to 2 oz/100 gal under difficult conditions.

AFTER FOAM FORMATION:

Once foam forms, mist **PREVENT™** over the foam to collapse it. Before misting, **PREVENT™** can be diluted 25 or 50 percent with water. If a mister is not available, apply a small stream to the foam. After defoaming, a small amount of **PREVENT™** added to the spray mixture prevents foam from reforming.

CONTAINER DISPOSAL

Store in the original container, always keep cap on tight. Do not allow water into the container, and then not use the product for an extended period of time. Always triple rinse the container and dispose of following appropriate government regulations.

Seller makes no warranty of fitness or merchantability. Buyer agrees that seller's maximum liability shall not exceed the purchase price of this product.

WARNING:

Harmful if swallowed. Causes eye irritation.

PRECAUTIONARY STATEMENTS:

Do not eat, drink or smoke when using this product. **If swallowed:** Call a POISON CENTER or doctor/physician if you feel unwell. **If in eyes:** Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do - continue rinsing.

FIRST AID: Eye contact: Check for and remove contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately. **Ingestion:** Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.
