

# CONDITION MAX™

## WATER CONDITIONING SYSTEM WITH FULL LOAD OF A NONIONIC SURFACTANT

### INGREDIENTS:

Concentrated ammonium sulfate, water conditioners,  
nonionic surfactant and formulation aids . . . . . 100%

**CONDITION MAX™** ingredients are exempt from requirements of a tolerance as specified in federal regulation 40 CFR 180.1001.

### KEEP OUT OF REACH OF CHILDREN

### GENERAL INFORMATION

**CONDITION MAX™** is a unique, multi-functional adjuvant for use with glyphosate and other pesticides. **CONDITION MAX™** deactivates hard water ions such as Ca, Mg, and Fe with a powerful water conditioning system that includes real ammonium sulfate (AMS) to enhance penetration, provide humectancy and superior water conditioning. **CONDITION MAX™** contains a full load of a unique, highly effective nonionic surfactant system that allows more pesticide to reach and stay on the target.

The concentrated formula allows low use rates with superior water conditioning and surfactant system. These three components provide a unique concentrated formula, which effectively conditions the water and increases pesticide penetration into the plant. The **CONDITION MAX™** proprietary formula even enhances "fully loaded" glyphosate formulations.

### DIRECTIONS

**CONDITION MAX™** recommend rate is 2 to 3 qt/100 gal. Use 3 to 4 qt/100 gal with very hard water and when weeds are hardened off.

**CONDITION MAX™** is compatible with all formulations of glyphosate.
